

WORRYPROOF WORDPRESS

Backup Options Comparison Chart

This chart compares the most popular plugins that back up the entire site (not just the WP database) and allow automatic backups to be scheduled.

	Plugin	Site	Migration	Multisite Support	Malware Scan	Stores to Remote FTP	Stores to Server	Stores to Vendor's Site	Stores to Amazon S3	Stores to Dropbox	Set Limit to Stored Bkps	Email Backup	Cost	Notes
Services	★ VaultPress	vaultpress.com	✓	✓	✓			✓					\$15+/mo	Best service for individuals. From Automattic. Realtime backups. Concierge services included. Backs up WP tables only. Malware scan + Migration in Premium/Enterprise only.
	★ ManageWP Professional	managewp.com	✓	✓		✓	✓		✓	✓	✓	✓	\$13+/mo	Best service for devs. Feature packed WP management solution that also includes backup. Ideal for managing multiple client web sites. White labeling available.
	BlogVault	blogvault.net	✓	✓				✓	✓				\$9+/mo	Trial Restore feature. Large Blog Backups. Restores directly to your server. Stores last 30 versions.
	myRepono	myrepono.com		✓				✓			✓		Usage	Reasonable charges for Storage + Bandwidth. Not WP Specific but has WP Plugin. Restore individual files or entire site.
Premium	★ BackupBuddy	getbackupbuddy.com	✓	✓	✓	✓	✓		✓	✓	✓	✓	\$75+	From iThemes. Great support. Priority on server compatibility. Regularly updated. DB repair tool. Easy for localhost devs. Restore wizard. Sucuri malware scan.
	★ GD Press Tools Pro	dev4press.com	✓	✓	✓	✓	✓		✓	✓	✓	✓	\$85+	Designed for advanced users. Cluttered UI. A full database maintenance tool that also does backups. Cleans spam comments and registrations. LOTS of options.
	WPDolly Pro	wpdolly.com	✓			✓	✓		✓	✓		✓	\$67	Very new. Looks promising, but no track record. Optimizes and repairs db. Not developer friendly - one license per client required.
Free	★ Xcloner	xcloner.com	✓	✓			✓		✓				Free	For advanced users only - setup options very technical. Has good restore wizard. Has responsive support in forums and a paid support option.
	★ BackWPU	WP Plugin Directory					✓		✓	✓	✓	✓	Free	Highly configurable schedule. Lots of offsite backup options. Restore requires phpmyadmin. No support at all. UI is a bit clunky. Some issues running on localhost.
	★ WP Backup to Dropbox	WP Plugin Directory					✓			✓			Free	No Scheduling. Simple manual backup to Dropbox. Uses the Dropbox Previous Versions for 30 days of file revisions. Restore via phpMyAdmin. Choose folders to exclude.
	BackUpWordPress	WP Plugin Directory					✓				✓	✓	Free	Newly updated. Backs up daily. Schedule not editable. DB restore requires phpmyadmin. Option to exclude files and directories. Backup DB, files or both.
	Automatic WP Backup	WP Plugin Directory							✓				Free	Backs up themes, plugins and uploads only, not entire site. Linux server required. Uses S3 Only. Can't save locally. DB restore requires phpmyadmin.
	EZPZ One Click Backup	ezpsolutions.net				✓	✓			✓	✓		Free	Requires Linux server and PHP 5+. I also could not make this one work in MAMP localhost. Choose folders to exclude. DB restore requires phpmyadmin.

Current as of January 15, 2012.
